caring for life

Fresenius Kabi

Your partner for TIVA delivery

Anaesthetics and opioids

We provide high quality and affordable total intravenous anaesthesia agents in a variety of presentations, broadly covering procedural needs of patients.

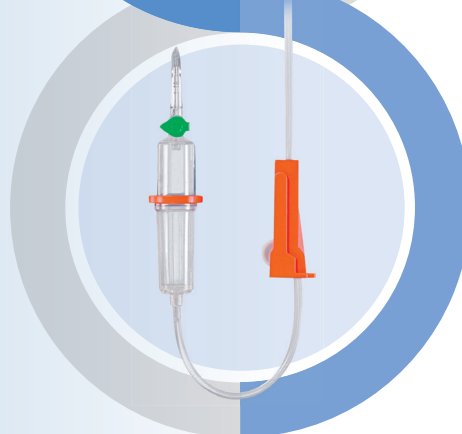

Rocuronium

Rocuronium Kabi is the drug of choice for muscle relaxation during rapid sequence induction because of its fast onset similar to suxamethonium. It offers flexibility in usage and patient groups, and superior safety (less histamine release, better Haemodynamic stability).

Agilia Connect TIVA pump

Our infusion pumps offer the main pharmacokinetic models for TCI and is designed for intuitive, and easy delivery of anaesthesia.

Infusion lines

Compatible administration systems for safe TIVA delivery.
